DETAILED ACTION

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires that when new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented. In the instant application claims 17, 28 and 36-39 have been omitted and there are two claims 33.

The claims have been renumbered as follows:

Claims 1-16 as originally filed remain numbered claims 1-16. Claims 18-27 as originally filed have been renumbered claims 17-26, respectively. Claims 29-35 as originally filed have been renumbered claims 27-33, respectively. The second occurrence of claim 33 as originally filed has been renumbered claim 34. Claims 40-44 as originally filed have been renumbered claims 35-39, respectively.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29 and 34-39, drawn to a micro-needle and systems, methods and kits for use thereof, classified in class 600, subclass 573.
 - II. Claims 30-33, drawn to a method of manufacturing a structure, classified in class 264, subclass 478.

Art Unit: 3736

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make another materially different product, such as beads for a necklace.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Bernard Shay on December 5, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles A. Marmor, II whose telephone number is (703) 305-3521. The examiner can normally be reached on M-TH (7:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (703) 308-3130. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3590 for regular communications and (703) 308-0758 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
